### Background of Gàidhlig (Scottish Gaelic) Local Profiles:

The 1891 census was the first such enumeration exercise with an unequivocal language question. After more than 100 years the original census forms are publicly available for detailed analysis. During research concerned with the "*Gàidhlig* (Scottish Gaelic) Local Studies" a vast number of such local statistics have been gathered about the *Gàidhlig* speaking population of Scotland in that year. As many of these results could not be included in the reports these concise fact-sheets are a welcome way to publish some of the "local gems". ## **Remarks:**

1. In original census report terms, the enumeration district in total had a population of 424 persons of all ages. 180 enumerated inhabitants spoke "Gaelic and English" and 224 persons were reported as monolingual Gàidhlig speakers. These figures led to an "official" share of Gàidhlig speakers of 95.3 %. A comparison with the more realistic statistics of this fact-sheet reveals that this percentage was an under-estimate of 4.7 % mainly caused by the inclusion of under-three olds and visitors in the official population base.
