# Gàidhlig (Scottish Gaelic) Local Studies ${ }^{1}$ 

Vol. 06: Na Hearadh<br>(Harris)

Author: Kurt C. Duwe

Extended ${ }^{2} \mathbf{2}^{\text {nd }}$ Edition
March 2024

## Executive Summary

This publication is part of a series dealing with local communities which were predominantly Gaelic speaking at the end of the $19^{\text {th }}$ century. Based mainly (but not exclusively) on local population census information the reports strive to examine the state of the language through the ages from 1881 until today. The most relevant information is gathered comprehensively for the smallest geographical unit possible and provided area by area - a very useful reference for people with interest in their own community. Furthermore, the impact of recent developments in education (namely teaching in Gaelic medium and Gaelic as a second language) is analysed for primary school catchments.

Volume 6 is concerned with the southern part of the largest island of the Western Isles. Harris and its neighbouring island of Scalpay are traditionally considered as major strongholds of Gaelic in Scotland. This fact was underlined by impressively high percentages of Gaelic speakers in census counts right until 1981. However, the last two census dates saw a considerable weakening of the language community especially in the pre-school population. Currently language maintenance based solely on intergenerational transmission is not completely assured on Harris as in many other rural parts of the Outer Hebrides. Only in a few locations like the island of Scalpay the language remains remarkably strong in contrast to the population centres of Tarbert and Leverburgh. But still a very high proportion of islanders could at least understand spoken Gaelic (almost 67 \%) in 2011.

[^0][^1]
## Foreword to the First Edition

Since 1881 every decennial population census in Scotland included a question about the "Gaelicspeaking" population. Despite some difficulty in interpreting this data (what really means to tick a box being able to speak Gaelic) this long-term data set holds a wealth of sociological and historical information. The series highlights the circumstances in which people speaking this Celtic language have lived and still live today. In most cases this data has been used only either for very problem-specific so-cio-linguistic studies or they were the basis of regional or Scotland wide analysis. However, it proved very difficult for people who were interested in their own local area to have a comprehensive overview of the number and distribution of Gaelic-speaking people right on their doorstep. This series is planned to cover all regions of Scotland where Scottish Gaelic (A'Ghàidhlig to be correct in its own words) was still spoken by a substantial part of the population at the start of the $20^{\text {th }}$ century. Accordingly, besides the main "Highland counties" of Sutherland, Ross \& Cromarty, Inverness and Argyll the fringe areas of Bute (including the Isle of Arran), western Caithness, Nairn, North Dunbartonshire and more particularly Highland Perthshire will be covered. It is hoped that these small reports will be of interest not only to science people but also to those who have to cope with opinions like "Gaelic was never spoken here" in their own local community.

## Foreword to the Second Edition

Almost two years have passed since the publication of the first volume of this series. In the meantime, a lot of "new" material has surfaced which merits to be publicised to a wider audience. In addition, two years are sometimes a very long time when looking at the actual state of a dynamic process: the reanimation of Scottish Gaelic in a number of places. Therefore, a second edition of the series is now being elaborated. Hopefully it will prove to be as popular as its predecessor.

## Foreword to the Extended Second Edition

I am very glad to present an extended and actualized edition of the Gàidhlig Local Studies after more than two decades since the first publication. Of course, new data and information had been waiting to be incorporated in this compendium of language development in Scotland. Maybe rather unexpectedly, many additional figures from the past became available, too - especially from the 1881, 1911 and 1981 censuses. As always, I wish happy reading - a few surprises wait to be discovered!!!!!

Important note: Although this text is written in the modern lingua franca for the purpose of maximum readership the object has to take its rightful place. Therefore, Gàidhlig placenames or expressions are preferred, and the socalled English version is mentioned in brackets where appropriate. For those unfamiliar with the language: Every Gaelic expression is written in italics and the other place names are mainly examples of anglicisation efforts of early cartographers.

## Acknowledgements

The author is indebted to many organisations which have been very kind in providing information about the subject. I am very grateful for this active encouragement. Very special thanks go of course to the General Register Office for Scotland for the opportunity to use the census material in this study. The team at the Demographic Dissemination Branch has been very supportive. Crown Copyright on the census data is acknowledged gratefully. Very worthwhile was also the relentless assistance of Mrs. Melissa Barlow of the University of Texas and Mrs. Liz Mackie of the University of Aberdeen who both proved to be very successful in unearthing rare material of more than a century ago. And last but not least thank is also due to the many individuals with whom I spent endless hours of discussion witnessing true Highland hospitality. Tapadh leibh a h-uile duine!

## 1 Introduction

Geographically it is by far the largest island of the Outer Hebrides, but it never really had a name of its own. The northern part is called Leòdhas (Lewis) and is separated from its southern neighbour Na Hearadh (Harris) by vast tracks of hill and moorland. For centuries this natural barrier was an effective hindrance to contacts between these communities, but it led also to the development of two very distinct dialects of Gàidhlig. In addition, both parts of the island were separated by the administrative county boundary between Inverness-shire and Ross \& Cromarty. This volume of the study is concerned with the less populated part of the island: Na Hearadh with its well-known ferry port of An Tairbeart (Tarbert). Leòdhas with the "island capital" of Steòrnabhagh (Stornoway) is dealt with in five separate volumes of this series.

The parish of Na Hearadh comprised quite a few adjacent islands with residential populations well into the $20^{\text {th }}$ century. The most famous examples of course were the islanders of far away Hiort (St. Kilda) who were evacuated at last in the 1930s. The thriving fishing community of Scalpaigh (Scalpay) is today connected to the main island by a causeway and has thereby secured an economic lifeline. The other smaller islands were all deserted decades ago, notably Scarp and Tarasaigh (Taransay). Although traditionally part of the civil parish of Na Hearadh the other inhabited island Beàrnaraigh (Berneray) is dealt with in vol. 5 of this series dealing with Uibhist a Tuath (North Uist).

Fig. 1: Overview map of area under investigation ${ }^{3}$

[^2]

The majority of the approximately 2,000 inhabitants are Protestants. This puts its mark on everyday life even today although the once very strictly obeyed Sunday is not as quiet as it used to be. Gàidhlig was used in these congregations very extensively as everyday church language and this fact helped to keep it in a central position as vernacular in the community in the past.

Although Na Hearadh has lent its name to the famous Harris Tweed the occupation of weaving is nowadays not a very significant economic factor anymore. Most inhabitants now live in the two major settlements An Tairbeart (Tarbert) and An t-Ob (Leverburgh) and on the island of Scalpaigh. The more rural parts have especially suffered from depopulation. Overall, the number of inhabitants now is far less than half of the figure in 1881 with more than 4,800 islanders. With this background in mind the following short chapters investigate the historical development of the use of Gaidhlig in the area from the end of the $19^{\text {th }}$ century till today - mainly highlighted by references to and analysis of population census results in local detail. Information on additionally available studies of language use and especially educational provision to study Gaidhlig (or even being educated through the medium of the language) is used where considered as appropriate.

## 2 The Historical Background

On Na Hearadh like the other Hebridean islands Gàidhlig has been the dominant community language for centuries. The language was so much an integral part of island society that the New Statistical Account of Scotland (1831-45) stated rather simplistic under the respective heading: "Language. - The Gaelic language is universally spoken."
In fig. 2 the development of Gàidhlig-speaking intensity is shown for Na Hearadh and its more southerly neighbour Uibhist a Tuath (North Uist). In both areas a considerable decrease since 1981 can clearly be depicted in this illustration. Within the following sections the temporal evolution of language incidence is described in more detail with special emphasis of course on decadal census results.

Fig. 2: Gàidhlig-speakers (3 years and over) as percentage of total population between 1881 and 2011 - civil parishes of Na Hearadh (Harris) and neighbouring Uibhist a Tuath (North Uist) ${ }^{4}$

[^3]

### 2.1 From Victorian times until the Second World War (Census 1881-1931)

Generally, Gàidhlig-speaking remained almost universally spoken on Na Hearadh in this period (see table 1). The first census enumeration exercises on "Gaelic-speakers" in 1881 and 1891 saw practically none of the locally born population unable to speak the language. Even one half of the population spoke no English according to the census 1891. At pre-school age most children in the Inverness-shire part of the Hebrides were returned as speaking no English at all even until 1931 (table 11) when the last census was taken before the war. Monolingual school education in English, however, effectively reduced overall the number of people who spoke only Gàidhlig (see fig. 3).

During the whole period Gäidhlig-speaking intensity was very high on the island, more to the contrary as in 1931 even the figures of 1901 were exceeded. Special strongholds of Gàidhlig were of course the remoter islands like Scalpaigh (Scalpay), An Scarp, Hiort (St. Kilda) and Tarasaigh (Taransay). All except Scalpaigh were sooner or later deserted by their inhabitants as a result of the harsh economic and of course natural climate.

| Subject $\backslash$ Census | $\mathbf{1 8 8 1}$ | $\mathbf{1 8 9 1}$ | $\mathbf{1 9 0 1}$ | $\mathbf{1 9 1 1}$ | $\mathbf{1 9 2 1}$ | $\mathbf{1 9 3 1}$ |  |
| Gädhlig-speakers (3 years + ) | 4,616 | 4,795 | 4,879 | 4,970 | 4,901 | 4,160 |  |
| \% of total population | $95.8 \%$ | $95.4 \%$ | $92.6 \%$ | $91.2 \%$ | $92.9 \%$ | $93.1 \%$ |  |

Table 1: Number of Gäidhlig-speakers (aged 3 years and over) in Na Hearadh (Harris) and percentage of total population speaking Gàidhlig during 1881-1931

Census information generally is very detailed for the years 1881, 1891 and 1901. Table 2 provides an overview of the individual strength of the language in different parts of the parish (see also tables 9 and 10 in the annex providing details of smaller islands and electoral areas). In all districts Gàidhlig speakers returned percentages well above the $90 \%$ mark. Because visitors and very young children (aged below 3 years) were included in the population base it can easily be implied that almost all local people used the Celtic language. In some more remote townships Gàidhlig monolinguals even had a handsome majority. This was not only true in isolated places like the island of Hiort (St. Kilda) but also in coastal hamlets such as Ceann Dibig (Kendibig) and Drinisiadair (Drinishader). There was almost no change in the strength of the language between 1881 and 1901.

A closer look at the original census forms of $1891^{5}$ reveals that even the high figures in the census reports were essentially underestimates of the real strength of Gàidhlig. For example, looking at the results of the enumeration district of Caolas Stocanais \& Leac a'Li (Kyles Stockinish \& Leckalee) the difference is obvious. Whereas the official census returns reported 232 persons speaking Gàidhlig ( $93.2 \%$ of the total population) the figures of the usually resident population (aged three years or over) reveal a share of 96.1 \% (Duwe, 2006). Just a handful of residents ( 9 individuals) had no " $G$ " (Gaelic only) or " $G \& E$ " (Gaelic and English speaking) marks on their registration sheets. These persons were the members of just two prominent households. "The certified schoolmaster originated from Ayrshire and apparently looked back to a long service in Aberdeenshire because his children were born in this Lowland area. The second family "with no Gaelic" was headed by a widowed house carpenter whose Dunbartonshire-born children also claimed to be unable to speak the language of their neighbours" (Duwe, 2006). All other households were entirely Gàidhlig-speaking with an equal share of monolingual and bilingual persons. Very pronounced, however, was the difference between women and men. Whereas most women did not speak English, most men were reported as speaking also the official language.

Table 2: Number of persons speaking Gäidhlig and all Gäidhlig-speakers as share of population in Na Hearadh and nearby islands according to local census data from 1881 to 1911

[^5]The status of Gàidhlig in education on Na Hearadh did not differ from the one of the other Invernessshire islands (see volumes 2,3 and 5 for details). Therefore, specific comments are not necessary here; the language was simply ignored or even discouraged in primary schools.

Right through to the eve of the Second World War Gàidhlig remained a strong community language in all places of Na Hearadh (table 2) although the number of speakers declined with the general trend of depopulation in the Outer Hebrides at the time. The famous linguist Carl Hj. Borgstrøm stayed for three weeks in Stocanais (Stockinish) to study the local dialect during November and December 1937. He remarked: "...even in the smaller towns like Tarbert, Gaelic is still the language of everyday use, though some persons have the habit of changing frequently from Gaelic into English and back again." (Borgstrøm ,1940). Linguistically the Gàidhlig spoken on Na Hearadh was considered to belong to the southern dialect of the Outer Hebrides and to differ significantly from the language of Leòdhas (Lewis).

Fig. 3: Share of population speaking Gäidhlig and/or English in the study area according to census results in 1891, 1911 and 1931

### 2.2 More Recent Developments (Census 1951-2011)

Many of the islanders left Na Hearadh after the Second World War causing a severe reduction of the population through the decades. The ability of speaking Gàidhlig, however, remained very strong until 1981 (see table 3). All County Council Electoral Divisions (CCED) boasted more than $90 \%$ of the population speaking Gàidhlig (table 11). There was even an under-estimation of Gàidhlig-speaking intensity in the census because the military personnel on Hiort (St. Kilda) was counted as part of the population of Na Hearadh (Deas) and this diluted the intensity artificially.

| Percentage of total population | $91.9 \%$ | $89.5 \%$ | $86.9 \%$ | $86.9 \%$ | $78.8 \%$ | $68.2 \%$ | $60.5 \%$ |

Table 3: Number of Gàidhlig-speakers (aged 3 years and over) in Na Hearadh (Harris) and percentage of total population speaking Gàidhlig during 1951-2011

In the Gàidhlig-speaking schoolchildren report (Scottish Council for Research in Education, 1961) the overwhelming majority of children lived in Gäidhlig-speaking homes and could then be considered as "mother tongue"-speakers. 358 of 380 primary school pupils were found to be first language speakers in 1957. In the first two primary stages of P1 and P2 in total 106 of 110 children understood Gäidhlig. The Inverness-shire Education Scheme started in 1960 (see Vol. 03 of this series) and probably had positive effects especially for those children who came to school without knowing any Gaidhlig. Within the

coming years the effect of increased mobility of the population with the influx of more and more monolingual English speakers and the still widespread low self-esteem of Gäidhlig speakers had its effect also on the school population.

A comparable study by Mackinnon (1977) found only 190 of 286 primary school children ( $66.4 \%$ ) speaking Gàidhlig as first language in the 1972/1973 school year. This reduction then was mainly caused by the especially low figures ( 52.1 \%) for first language speakers in An Tairbeart, whereas in the remaining rural schools the percentages still was very high at $86.9 \%$. Mackinnon concluded: "Fifteen years have considerably weakened the incidence of Gaelic as a mother tongue amongst Harris primary school children, but this is far less marked in rural areas. ... It would seem that there are indications that the deliberate choice of English as a home language amongst the non-crofting 'working' or 'lower' class may be made as the result of a belief that Gaelic may 'hold back' the children in terms of their life chances. As this phenomenon is most pronounced in Tarbert, the principal commercial centre of the Isle of Harris, it can be seen that taken together with the centralisation of educational facilities and the concomitant bussing and mixing of the school children there is a reinforcement of the pressures causing Gaelic to be shifted out of such domains of usage as communication with age-peers and recreational facilities." These circumstances did not differ very much in Na Hearadh from those in other parts of the Gaidhealtachd at that time. Many Gàidhlig speakers considered the language as something second rate and useless outside their own homes. The author himself met a very nice landlady on the island in the 1970s who "could only laugh at the very thought of bilingual street signs in Tarbert."

The cracks in the language front were slowly getting thicker but were not becoming apparent in the census of 1981. Language shift was occurring more between Gàidhlig as a first (or home) language or second language. An additional positive impact on the educational side was provided by the success of the bilingual project (Murray \& Morrison, 1984) which is shown in figure 4 where at early primary school age pupils learnt to read and write the language (see also Vol. 02 of this series). All primary schools except An Tairbeart and the tiny school at Reinigeadail were involved.

Fig. 4: Percentage of children able to speak, read or write Gàidhlig in different age groups in 1981 Na Hearadh (Harris)

Between 1981 and 1991 a considerable reduction occurred in the Gàidhlig-speaking intensity in all groups (see fig. 5). The retreat of the language was most obvious of course around An Tairbeart whereas Scalpaigh remained as staunchly Gàidhlig as ever (table 13). During the following years the "Gaelic renaissance", however, was at last also reaching Na Hearadh and enthusiasm amongst parents for Gàidhlig medium spread. Cròileagan were established on Scalpaigh, in An t-Ob and An Tairbeart. Two Gàidhlig medium units were opened in An Tairbeart (1991) and An t-Ob (1992) with sradagan groups at both locations. But despite all this another severe decrease in the Gäidhlig-speaking pre-school population was experienced in 2001 (detailed analysis of this census is provided in chapter 3 of this report.

The educational efforts did not seem to be sufficient to turn the tide and increase the number of fluent speakers in young age groups considerably. The uptake of Gàidhlig-medium education in the two larger primary schools was still comparatively low and comprised less than $20 \%$ of the total intake (see fig. 9). This state may have been improved by increasing the number of children attending the existing cròileagan and by a far higher profile of the language in public life. In 2003/2004 for example 36 children at the age 3 or 4 were enrolled at the Gàidhlig-medium day nurseries in Scalpaigh, An Tairbeart and $A n t-O b$. According to public consultations for a Language Management Plan of the Outer Hebrides in 2005 "of the 16 pupils in Seilibost School, only 5 have Gaelic. Of the 24 pupils in Scalpay School, 10 are fluent speakers." Perhaps not a heartening statement but at least there was still light at the end of the tunnel!

Fig. 5: Percentage of Gàidhlig-speakers in different age groups between 1971 and 2001 Area of Na Hearadh (Harris) ${ }^{9}$

2011 saw generally a further decrease of Gàidhlig speaking on Na Hearadh (table 3). This was especially so in the southern portion of the island around An t-Ob (Leverburgh). The total population remained almost the same since 2001. 1.685 inhabitants were born in Scotland ( $82.0 \%$ ) compared with 1.865 ( $88.0 \%$ ) ten years before. Accordingly, the percentage of Gàidhlig speakers based on the total population may be an underestimate when thinking of a "local" community.

Unfortunately, the local data about the age structure of the language community were not as detailed in 2011 as in previous censuses. In contrast to the previously used small output areas, in 2011 the somewhat larger data zones were used as smallest geographical area for age distribution analysis. Accordingly, a direct comparison with 2001 data is not always possible. However, the figures of Gàidhlig
${ }^{9}$ Under 5: Gàidhlig abilities in the age group 3-4 until 1991, in 2001 in all age groups 0-4.

knowledge for the 3-15 age group and the total population is provided in table 4 for local selected data zones. The intergenerational viability of these selected census data zones show far more favourable conditions around An Tairbeart and Scalpaigh.

A new feature in the 2011 census was a question about the language (other than English) used at home. This saw in this area roughly $75 \%$ of Gäidhlig speakers living in households where the language was used. This information is also provided in table 4, too.

| Census Data Zone | Na Hearadh - Census 2011 |  |  |  |  |  |

### 2.3 Development of literacy in Gàidhlig between 1971 and 2011

Information on literacy became available from 1971 onwards: Census questions were introduced on the ability to read or write Gàidhlig (see tables 4 and 5 below). Generally, literacy in the language on $N a$ Hearadh was higher than in pre-dominantly Catholic areas of the Outer Hebrides. Reading or writing abilities were comparable to those achieved on Uibhist a Tuath (North Uist), Leòdhas (Lewis) and the northern parts of An t-Eilean Sgitheanach (Isle of Skye). This high literacy was attained in all age groups (see figure 6). The only significant improvements between 1971 and 2001 could and were achieved in primary school age from about $50 \%$ to almost $80 \%$ of pupils being able to read the language.

|  | Number of Gàidhlig-speakers with <br> ability to read Gàidhlig |  |  |  | Percentage of Gàidhlig-speakers with abil- <br> ity to read Gàidhlig |  |  |  |  |  |

## 3 Digression: The Situation of 2001 in Focus

Census results for 2001 were the most comprehensive and detailed information base ever provided for Scotland. This was also true for the inclusion of questions on Gàidhlig language knowledge. Two new aspects were introduced:

1. Persons were asked whether they were "able to understand spoken Gaelic".
2. Children under the age of 3 were enumerated regarding their language abilities.

IMPORTANT NOTICE: The more recent census data of 2011 were not as detailed as 2001 regarding generational differences in language use. Therefore 2001 is used here as baseline for research purposes. The following sections will describe generally the distribution of language abilities (inter-generational and community by community) and the specific conditions of the younger age groups in local primary school catchments.

### 3.1 General overview: Gàidhlig language capabilities in 2001

Special consideration is given to educational aspects in section 3.2 dealing with the young generation in school catchments. In general, the following conclusions may be drawn from the 2001 census information for Na Hearadh:

- The percentages of the population knowing or speaking Gàidhlig were slowly increasing with age, primary and pre-school generations are well underrepresented (fig. 7).
- Table 6 shows a strong decrease of language abilities in all age groups since 1991. The difference of percentages speaking Gàidhlig between all ages and the younger generation was still small; there had been generally a contraction of the Gàidhlig-speaking population in all generations (probably predominantly caused by the in-migration of monolingual English speakers).
- Looking at the results of the small area statistics (table 13) Gàidhlig speaking ability was lowest around An Tairbeart (57 \%), but highest on Scalpaigh (88 \%) and at Seilebost (91 \%). The ability to understand spoken Gàidhlig varied between 66.4 \% (Aird Aiseig) and 95.5 \% (Scalpaigh).
- Figure 8 provides an insight on the relative strength of local language communities. The majority of the population lived in neighbourhoods where between $65 \%$ and $80 \%$ knew the language and the rest of the islanders were part of even stronger language communities.
- Literacy levels were very high on Na Hearadh in 2001 as it was traditionally so in Protestant Gàidhlig speaking areas. Over two thirds of speakers could read and write the language and more than $80 \%$ were able to read Gàidhlig.
- Children under 3 years of age show language intensities of $16.3 \%$ (speaking) and $46.9 \%$ (understanding). Those 23 children were not spread evenly over the island but were concentrated in the rural output areas of Direcleit and Seilebost (11), on the island of Scalpaigh (5) and around An t-Ob and Roghadal (5) in the south.
- The new category of understanding Gäidhlig recorded 188 respondents ( $9.5 \%$ ) on Na Hearadh in addition to those $1,369(69.0 \%)$ able to speak the language.

### 3.2 Children with knowledge of Gàidhlig in primary school catchments

Aggregrating the information of the small area statistics for the catchments areas of local primary schools provides an interesting avenue to investigate the influence of local authority and parental attitudes towards Gäidhlig. It is possible to calculate numbers and percentages for different age groups and for the purpose of this investigation they have been attributed to pre-school age (0-4), primary school age ( $5-11$ ) and secondary school age (12-15). As an additional indicator a column is provided in table 7 with the age group of 24-35 which is meant to represent the language abilities of possible parents.

| Knowledge of Gàidhlig (Census 2001) in Selected Primary School Catchment Areas |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Primary School(s) | $\begin{gathered} \text { "Pre-School"' } \\ \text { Age 0-4 } \\ \hline \end{gathered}$ |  | $\begin{aligned} & \text { "Primary" } \\ & \text { Age 5-11 } \\ & \hline \end{aligned}$ |  | $\begin{gathered} \text { "Secondary"' } \\ \text { Age 12-15 } \\ \hline \end{gathered}$ |  | 'Parents'"Age 25-34 |  |
| An $t-O b$ <br> (Leverburgh) | 8 | 50.0 \% | 29 | 61.7 \% | 32 | 88.9 \% | 38 | 80.9 \% |
| Seilebost (Seilebost) | 2 | 40.0 \% | 5 | 83.3 \% | 6 | 66.7 \% | 11 | 84.6 \% |
| Cliasmol (Cliasmol) | 2 | 50.0 \% | 4 | 57.1 \% | 4 | 57.1 \% | 10 | 47.6 \% |
| An Tairbeart (Tarbert) | 18 | 52.9 \% | 50 | 67.6 \% | 37 | 77.1 \% | 64 | 78.1 \% |
| Scalpaigh (Scalpay) | 7 | 43.8 \% | 26 | 90.0 \% | 19 | 100. \% | 24 | 92.3 \% |

Table 8: Number and percentage of persons with knowledge of Gàidhlig in selected age groups for primary school catchment areas according to the census 2001

Generally, the following conclusions may be drawn for the individual catchment areas of Na Hearadh:

- Pre-school children: Approximately one half of the children could understand the language. Croileagan existed in An Tairbeart, An t-Ob and Scalpaigh at the time of the census which might have helped to sustain Gàidhlig knowledge in this age group. The percentage of understanding the language in 2001 at the age of 3 or 4 was comparable with the result of "able to speak" Gàidhlig in 1991. Percentages of Gàidhlig knowledge were substantially lower than those of the parental generation; the intergenerational language transition was not maintained sufficiently.
- Primary school children: The two larger primary schools provided Gàidhlig medium education: 26 GME children were counted in the 2000-2001 school year (out of 167 children), this means only $15.6 \%$. The remaining pupils experienced "bilingual" mainstream education which at least for Seilebost and Scalpaigh did succeed in producing a high percentage of language ability and/or (very probable) many of these children came from Gäidhlig-speaking homes. The provision of sradagan groups in An Tairbeart and $\mathrm{An} t$ - Ob might have also improved language proficiency at primary school age.
- Secondary school children: In the 2000/2001 school year in total 20 out of 57 pupils were learning Gàidhlig as "fluent speakers"; the rest were categorised as "learners" in the secondary stages S1 and S2. 15 pupils had gone through GME in local primary schools before entering secondary education. The remaining "fluent" children were probably mother-tongue speakers from the other smaller primary schools.
- Parents: The intensity of knowing Gàidhlig was generally high in all school catchments except perhaps at the small school of Cliasmol. As mentioned before the transfer of the language to the next generation does not seem to be sufficient to maintain Gàidhlig in the same intensity.

It is quite clear that the language on Na Hearadh is not as strongly maintained as in comparable strongholds of Cymraeg (the Welsh language) in Wales where the pre-school Welsh speaking percentage generally matches the values in the parental generation and primary school language knowledge is seldom lower than $80 \%$. The main differences between both language communities are of course the higher societal status of Cymraeg in Wales and the exclusive Welsh medium education in Welsh speaking areas. This unfavourable comparison holds of course true for all the other remaining Gàidhlig speaking "strongholds" in Scotland.

## 4 Future Perspectives - 2011 and beyond

Census results of 2011 can also be interpreted in terms of future viability and prospects of Gàidhlig in this island community. The language viability indicator $\mathrm{LVI}^{11}$ is negative although considerably more favourable than in the Outer Hebrides as a whole (table 9).

| Area | Na Hearadh - Census 2011 |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Knowledge of Gàidhlig |  |  |  |  | Gàidhlig as home language (\% of speakers) |
|  | Young age(3-15) |  | All ages |  | Difference (Language viability indicator) |  |
| Na Hearadh (Harris) | 133 | 61.9\% | 1256 | 67.2\% | -5.3 \% | 82.2 \% |
| In comparison: <br> Na h-Eileanan an Iar (Western Isles) |  | 48.8 \% |  | 61.2 \% | - 12.4 \% | 76.8 \% |

Table 9: Intergenerational viability and Gàidhlig as home language in Na Hearadh (Harris) in comparison with the whole Na h-Eileanan an Iar (Western Isles) according to census data of 2011

The overall temporal evolution of Gàidhlig-medium primary education is depicted in fig. 9 for the period 1992-2023. For example, in the 2022-23 session 46 pupils ( $51.1 \%$ ) attended the GMU in Bàgh $a^{\prime}$ 'Chaisteil and 10 pupils ( $50.0 \%$ ) were recorded in the $\mathrm{An} t-\mathrm{Ob}$ GMU.

Fig. 9: Share of primary school children attending Gàidhlig-medium classes on Uibhist a Tuath and Na Hearadh (September 1992 - September 2023) ${ }^{12}$

[^7]

In conclusion: Language maintenance on Na Hearadh based exclusively on intergenerational transmission is not completely assured. This fact is also experienced in most other rural parts of the Outer Hebrides. A few locations like the island of Scalpaigh keep the language far better than the population centres of $A n$ Tairbeart and $A n \boldsymbol{t} \boldsymbol{- O b}$. But still a very high proportion of islanders ( $67 \%$ ) could at least understand Gàidhlig in 2011.

## III. Some Valuable Comments about Census Information

The interpretation of census figures (derived statistics in particular) is not as straightforward as the pure numbers might suggest. The author has taken great pains to compare like with like and the calculated tables with greatest geographical detail and age group information as possible. But the differences of census questions, enumeration districts and information details between years are quite substantial. It is therefore very important to notice the following facts:

1. Questions on Gàidhlig have been raised in census enumerations in Scotland since 1881. In this first instance, however, it was asked whether the person "speaks Gaelic habitually" and the information was provided by the enumerator. From 1891 onwards this wording was changed into "speaks Gaelic" and the information was given by the head of the household. Accordingly direct comparison of the results of 1881 and later years is not possible.
2. Until 1971 it was asked whether the person "speaks Gaelic and English" or "speaks Gaelic but not English" (Gaelic only). Due to the simple necessity to survive in an English dominated society and the considerable impact of the school system in fact all Gàidhlig-speaking people were forced to become bilingual - with the notable exceptions of pre-school children and very old people. These "Gaelic only" persons did not, however, present those who had Gäidhlig as their natural and preferred language nor were they the only mother tongue speakers. This was already highlighted after the census 1911 by comments given by the then registrar general and the superintendent of statistics in the county report on Inverness (Census Office, Scotland, 1912): "When discussing the statistics of the Gaelic-speakers of Argyll we expressed an opinion that the reduction in the number of persons speaking Gaelic but unable to speak English should not be taken as a proof that the use of the language was being discontinued, and after making a similar study of statistics of the Gaelicspeakers of the islands of Inverness, we are in a position to repeat that opinion. One fact alone seems to justify such an expression, and that is that fully three-fourths of the children of less than school age, more than three but less than five, speak Gaelic exclusively. Such a condition seems possible only when Gaelic is the language habitually spoken in the homes, and this seems conclusive evidence of its wide and habitual use." Due to the ever increasing presence of English in the Gàidhlig community (mixed language marriages, in-migration of English only speakers, radio and television) more and more children under the age of 5 became bilingual and the census question proved to be irrelevant after the $2^{\text {nd }}$ World War. Because of the very small numbers involved and the ambiguety of the question no census enumeration took place after 1971 on persons who spoke Gàidhlig but no English.
3. No data are available on persons speaking Gàidhlig outside Scotland in the rest of the United Kingdom. Census returns are, however, recorded in Canada where the Gäidhlig language survived as a community language in a few locations of the province of Alba Nuadh (Nova Scotia) well into the 1940s.
4. During Word War II no census was taken. Therefore no figures are available for 1941.
5. In 1971 the wording was changed from "speaks Gaelic" into "is able to speak Gaelic". This resulted in areas with low density of speakers in a substantial increase of Gàidhlig-speakers counted compared with 1961. These were essentially those who could speak Gàidhlig but did not have the opportunity to use it. In strongly Gàidhlig-speaking areas those who were able to speak Gàidhlig were also using the language. So in the islands and on the western seaboard the figures should have remained comparable with previous censuses.
6. In 1981 the population basis was changed from persons present on census night to usually resident persons. In the light of increased mobility of the population this change was inevitable.
7. From 1971 onwards additional questions were asked on the ability of people to read Gàidhlig or to write Gàidhlig.
8. In 2001 another question was introduced on the ability of a person to understand spoken Gàidhlig. This may have had an influence on some people with only a small command of the language to record themselves as being able to understand rather than able to speak the language. Without this choice some of them might have enlisted themselves or their children as Gäidhlig-speaking in order to be counted at all. This may explain the small decrease of speakers in the age group of 3 to 4 despite the strong efforts by the croileagan movement in the preceding decade.
9. Additionally in 2001 for the first time all children under the age of 3 were recorded with their knowledge of Gàidhlig. In previous enumerations these children were not counted or (in 1891 and 1901) only a few children were enumerated in this age group. In many census publications percentages were calculated by using the enumerated Gàidhlig-speaking population (aged 3 years and over) on the basis of the total population. This led to slightly lower percentages than actually existed.
10. Census counts are not strictly exact. Apart from inevitable small enumeration errors the census authorities have introduced measures to keep returns anonymous. For example in 1971 figures in tables were rounded to the nearest 0 or 5 . This fact represented a major obstacle in using small area statistics for further evaluation because of the small numbers involved. Comparable measures were taken in later censuses but with smaller overall "uncertainties" of $+/-1$ in general.

## V. List of Tables

## REPORT

1 Number of Gàidhlig-speakers (aged 3 years and over) in Na Hearadh (Harris) and percentage
of total population speaking Gàidhlig during 1881-1931

2 Number of persons speaking Gàidhlig and all Gàidhlig-speakers as share of population in Na Hearadh and nearby islands according to local census data from 1881 to 1901
3 Number of Gàidhlig-speakers (aged 3 years and over) in Na Hearadh (Harris) and percentage 9 of total population during 1951-2011
4 Intergenerational viability and Gàidhlig as home language selected census data zones in com-
5 parison with the whole Na h-Eileanan an Iar (Western Isles) according to census data of 2011
6 Persons able to write Gàidhlig and Gàidhlig writers as share of Gàidhlig-speakers (1971-2011)
$7 \quad$ Knowledge of Gàidhlig in younger age groups in Na Hearadh (Harris) in 2001 and 1991
8 Number and percentage of persons with knowledge of Gàidhlig in selected age groups for 16 primary school catchment areas according to the census 2001
9 Intergenerational viability and Gàidhlig as home language in Na Hearadh (Harris) in compar- 18 ison with the whole Na h-Eileanan an Iar (Western Isles) according to census data of 2011
10 Number of persons speaking Gàidhlig in 1881 and 1891 - selected areas (county council elec- 20 toral divisions or inhabited islands) in Na Hearadh
11 Number of persons speaking Gàidhlig between 1901 and 1971 - selected areas (civil parish, census registration districts, electoral areas or inhabited islands) in Na Hearadh
12 Percentage of persons speaking Gàidhlig but no English (aged three years and over) for different age groups in island parishes of former Inverness-shire according to census data from 1891 to 1931
13 Number of persons speaking Gàidhlig and all Gàidhlig-speakers as share of population (aged three years and over) for pre- 1975 county council electoral divisions according to census data from 1961 to 2001 (Beàrnaraigh is included in Na Hearadh - Deas)
14 Population with Gàidhlig knowledge in output areas of Na Hearadh (Harris) according to age group and birthplace in 1981
15 Number and percentage of Gàidhlig-speakers for the census output areas in Na Hearadh24 (Harris) between 1981 and 2001
16 Gàidhlig-speakers in different age groups in Na Hearadh (Harris) from 1971 to 2001
17 Intergenerational viability and Gàidhlig-speakers born in Scotland in Na Hearadh (Harris) 25 according to census data of 2001

## ANNEXES

A-1 List of locations within individual census output areas and official numbers for different cen- 39 sus dates for Na Hearadh (Harris) - 1961-2001 - Part A
A-2 List of locations within individual census output areas and official numbers for different cen- 40 sus dates for Na Hearadh (Harris) - 1961-2001 - Part B

## VI. List of Figures

## REPORT

1 Overview map of area under investigation 5
2 Gàidhlig-speakers (3 years and over) as percentage of total population between 1881 and 2011

- civil parishes of Na Hearadh (Harris) and neighbouring Uibhist a Tuath (North Uist)

3 Share of population speaking Gàidhlig and/or English in the study area according to census results in 1891, 1911 and 1931
4 Percentage of children able to speak, read or write Gàidhlig in different age groups in 1981 -
Na Hearadh (Harris)
$5 \quad$ Percentage of Gàidhlig-speakers in different age groups between 1971 and 2001 - Area of Na 11 Hearadh (Harris)
6 Persons able to read Gàidhlig as a percentage of Gàidhlig-speakers on Na Hearadh (Harris) in 13 different age groups (1971-2001)
$7 \quad$ Percentage of population able to understand or speak Gàidhlig and year of birth - area of Na 15 Hearadh (Harris) according to Census 2001
8 Share of population living in neighbourhoods (census output areas) with different intensity of 16 language knowledge in Na Hearadh (Harris) according to Census 2001
9 Share of primary school children attending Gàidhlig-medium classes on Uibhist a Tuath and 18 Na Hearadh (September 1992 - September 2023)
10 Overview map of census output areas for Na Hearadh

## VII. List of Abbreviations

There are a number of abbreviations used in the text which might not be known by every reader. Therefore, this short list intends to facilitate better understanding:

CCED County council electoral division

CP
CNSA
Comhairle nan Eilean
(CNE) - later:
Comhairle nan Eilean Siar
(CNES)
Croilleagan
Fèis
GLPS
GME
GMU
GROS
LVI
LCI
Mòd
n/a
OA
P1
P2
S1
S2
Sgoil Araich
Sràdagan

Civil parish
Comhairle nan Sgoiltean Araich: Gaelic playgroup association
Official name of the Western Isles Council, the local government body of the Outer Hebrides (with abbreviations)

Gaelic speaking playgroup
Local art festival with normally some Gaelic courses
"Gaelic Language for the Primary School": Course as introduction of Gaelic as second language
Gàidhlig-medium education
Gàidhlig-medium unit: Class(es) with Gàidhlig-medium education but as part of an English medium school
General Register Office for Scotland
Language viability indicator
Language community indicator
Gaelic language gathering (conversation, song and music) comparable to the Welsh Eisteddfod
Information is not available
(Census) output area: the smallest enumeration unit on which census data are available
Primary school year 1
Primary school year 2
Secondary school year 1
Secondary school year 2
Gaelic speaking nursery school
Gaelic speaking clubs for primary school children

    ${ }^{2}$ Tables were extended with more census results of enumeration districts provided for 1881, 1891, 1901, 1911 and 1981.

[^2]:    ${ }^{3}$ Digital boundaries courtesy of Ordnance Survey as part of the Geography Products provided by GROS.

[^3]:    ${ }^{4}$ There was no census taken in 1941 because of World War II - values are therefore interpolated between 1931 and 1951.

[^4]:    ${ }^{5}$ After a period of 100 years information provided on the original census forms is publicly available. At the time of writing this is already the case for census returns of 1881, 1891 and 1901.

[^5]:    ${ }^{6}$ Enumeration division or island.
    ${ }^{7}$ Percentages of Gàidhlig-speakers above $50 \%$ are marked by bold figures.
    ${ }^{8}$ Percentages of monolingual Gàidhlig-speakers above $10 \%$ are marked by bold figures.

[^6]:    ${ }^{10}$ Persons able to understand spoken Gàidhlig and/or able to speak, read or write Gàidhlig.

[^7]:    ${ }^{11}$ LVI: The "Language Viability Indicator" is a measure of the prospective reproductivity of language speakers in a community. It is here defined on the basis of knowledge of Gàidhlig in the census and is calculated by the difference of percentages between the age group below 25 years of age and the total population.
    ${ }^{12}$ Gaelic Dept, University of Strathclyde.

[^8]:    ${ }^{13}$ Civil parish of Na Hearadh (Harris) only. These figures therefore include the inhabitants of Beàrnaraigh which is commonly included in the statistics of Uibhist a Tuath (North Uist). Please see Vol. 05 of this series.

[^9]:    ${ }^{14}$ Civil parish of Na Hearadh (Harris) only. These figures therefore include the inhabitants of Beàrnaraigh which is commonly included in the statistics of Uibhist a Tuath (North Uist). Please see Vol. 05 of this series.
    ${ }^{15}$ Due to rounding of figures to the nearest 0 and 5 it is impossible to provide exact "Gaelic only" numbers in 1971. The figures in the table should be read as „between 2,458 and 2,462 " and „between 21 and 29 " respectively.

[^10]:    ${ }^{16}$ Islands of Barraigh (Barra), Uibhist a Deas (South Uist), Beinn a 'Bhaoghla (Benbecula), Uibhist a Tuath (North Uist), Na Hearadh (Harris), An t-Eilean Sgitheanach (Skye) and some smaller outlying islands (Scotland Census Office, 1932).

[^11]:    ${ }^{17}$ Figures may not add up exactly because of measures to keep returns anonymous.
    ${ }^{18}$ A more detailed list of all locations in each output area is to be found in section IV.
    ${ }^{19}$ Scottish born population aged 3 years and over.

[^12]:    ${ }^{20}$ Statistical base is the population aged 3 years and over in 1981 and 1991 and the total population in 2001.
    ${ }^{21}$ Speakers of Gàidhlig but not English in 1971 are distributed in age groups according to general distribution for the counties of Inverness-shire and Ross \& Cromarty (approximate numbers are given in brackets).

[^13]:    ${ }^{22}$ Placenames are given according to official information by the Ordnance Survey and used in modern maps. The placenames in the Outer Hebrides do have officially Gàidhlig names. "English" versions are only used in addition for major settlements. Therefore the old anglicised names are provided in table A-1 for a few prominent locations only.
