Extended ${ }^{2}{ }^{\text {nd }}$ Edition
March 2024

## Executive Summary

This publication is part of a series dealing with local communities which were predominantly Gaelic speaking at the end of the $19^{\text {th }}$ century. Based mainly (but not exclusively) on local population census information the reports strive to examine the state of the language through the ages from 1881 until today. The most relevant information is gathered comprehensively for the smallest geographical unit possible and provided area by area - a very useful reference for people with interest in their own community. Furthermore, the impact of recent developments in education (namely teaching in Gaelic medium and Gaelic as a second language) is analysed for primary school catchments.

Islay and its less populated neighbours of Jura and Colonsay had once very strong Gaelic-speaking communities. But the good accessibility of the islands and a failing educational system led to severe decline in language use after the Second World War. Today Gaelic still suffers from decades of neglect and ignorance in the southernmost Hebrides. The basis for a consolidation of language use is rather limited and the language community has a strong bias towards the older generation. Educational provision is not on a comparable level with other islands in the Inner Hebrides. This in itself provides the main growth potential. Improvements could be accomplished through intensified Gaelic medium provision and dedicated second language teaching in local primary schools. Future positive impacts can be expected by the extension of activities around Ionad Chaluim Chille (St. Columba Centre) in Bowmore.

## Foreword to the First Edition

Since 1881 every decennial population census in Scotland included a question about the "Gaelicspeaking" population. Despite some difficulty in interpreting this data (what really means to tick a box being able to speak Gaelic) this long-term data set holds a wealth of sociological and historical information. The series highlights the circumstances in which people speaking this Celtic language have lived and still live today. In most cases this data has been used only either for very problem-specific so-cio-linguistic studies or they were the basis of regional or Scotland wide analysis. However, it proved very difficult for people who were interested in their own local area to have a comprehensive overview of the number and distribution of Gaelic-speaking people right on their doorstep. This series is planned to cover all regions of Scotland where Scottish Gaelic (A'Ghàidhlig to be correct in its own words) was still spoken by a substantial part of the population at the start of the $20^{\text {th }}$ century. Accordingly, besides the main "Highland counties" of Sutherland, Ross \& Cromarty, Inverness and Argyll the fringe areas of Bute (including the Isle of Arran), western Caithness, Nairn, North Dunbartonshire and more particularly Highland Perthshire will be covered. It is hoped that these small reports will be of interest not only to science people but also to those who have to cope with opinions like "Gaelic was never spoken here" in their own local community.

## Foreword to the Second Edition

Almost two years have passed since the publication of the first volume of this series. In the meantime, a lot of "new" material has surfaced which merits to be publicised to a wider audience. In addition, two years are sometimes a very long time when looking at the actual state of a dynamic process: the reanimation of Scottish Gaelic in a number of places. Therefore, a second edition of the series is now being elaborated. Hopefully it will prove to be as popular as its predecessor.

## Foreword to the Extended Second Edition

I am very glad to present an extended and actualized edition of the Gàidhlig Local Studies after more than two decades since the first publication. Of course, new data and information had been waiting to be incorporated in this compendium of language development in Scotland. Maybe rather unexpectedly, many additional figures from the past became available, too - especially from the 1881, 1911 and 1981 censuses. As always, I wish happy reading - a few surprises wait to be discovered!!!!!

Important note: Although this text is written in the modern lingua franca for the purpose of maximum readership the object has to take its rightful place. Therefore, Gàidhlig placenames or expressions are preferred, and the socalled English version is mentioned in brackets where appropriate. For those unfamiliar with the language: Every Gaelic expression is written in italics and the other place names are mainly examples of anglicisation efforts of early cartographers.

## Acknowledgements

The author is indebted to many organisations which have been very kind in providing information about the subject. I am very grateful for this active encouragement. Very special thanks go of course to the General Register Office for Scotland for the opportunity to use the census material in this study. The team at the Demographic Dissemination Branch has been very supportive. Crown Copyright on the census data is acknowledged gratefully. Very worthwhile was also the relentless assistance of Mrs. Melissa Barlow of the University of Texas and Mrs. Liz Mackie of the University of Aberdeen who both proved to be very successful in unearthing rare material of more than a century ago. And last but not least thank is also due to the many individuals with whom I spent endless hours of discussion witnessing true Highland hospitality. Tapadh leibh a h-uile duine!

## 1 Introduction

The investigations described are concerned with the state and development of Gàidhlig in the southern Inner Hebrides. Ile (Islay) and its neighbours Diùra (Jura) and Colbhasa (Colonsay) were overwhelmingly Gàidhlig-speaking until after the Second World War and a considerable number of islanders still cherish their language and traditions. However, these islands tended always to be easily overseen when the Gàidhlig tradition of the Hebrides was concerned - unjustifiable so. The connections with nearby Ireland have always had an economic and a cultural side the latter being emphasised recently by the St. Columba initiative with its centre in Bogha Mòr (Bowmore).

The islands are hilly in places, more or less wind-swept with open moorland and only a few stretches of good grazing land. Nonetheless agriculture and whisky distilling provide major income for the islanders who very often have several occupations to make ends meet. Crofting schemes are still operating in some communities enabling some local people to stay on their island. In contrast to other islands in the Inner Hebrides the vast majority of the inhabitants of Ile is born in Scotland and born and bred Ileachs make up still a considerable part of the population. Diùra on the other hand despite its size has never had a large population and may be described as a giant deer forest. Colbhasa is the most socially and economically vulnerable community of them all with sometimes difficult ferry connections and associated economic remoteness.

Administratively all the islands belonged to the County of Argyll until local government reorganisation in 1975 when this county was amalgamated with the huge Strathclyde Region with its capital Glasgow. In the 1990s decentralisation turned the clock back a little bit and the Argyll \& Bute local authority was established. Educational policy changed hands (and directions) quite frequently on the islands in question.

Ile is by far the most populous island. Its 3,200 inhabitants occupy an area of 102,600 hectares. Almost 1,600 of these live in the two island towns of Port Ilein (Port Ellen) and Bogha Mór (Bowmore). The remaining islanders live in small townships often renowned for their special whisky distillery. The neighbouring islands are far less populated with Diùra (Jura) and Colbhasa (Colonsay) reporting 196 and 132 inhabitants respectively in 2011.

With this background in mind the following short chapters will look into the historical development of the use of Gàidhlig in the area from the end of the $19^{\text {th }}$ century until today - mainly highlighted by references to and analysis of population census results in local detail. Information on additionally available studies of language use and especially educational provision to study (or even being educated through the medium of the language) is used where considered as useful. Figure 1 provides an overview of the area of interest ${ }^{3}$.

## 2 The Historical Background

Until recent decades the Argyll-shire islands of Ile, Diùra and Colbhasa belonged to the most strongly Gàidhlig-speaking communities in Scotland. The New Statistical Account of Scotland (1831-1845) for example reported about the state of the language in the Ile (Islay) parish of Cill Chuimein (Kilchoman) in the early $19^{\text {th }}$ century: "Gaelic is the language universally spoken by the natives in their intercourse with one another. The English language is generally well understood; and from the number of families and individuals from the low country settled in the parish, it is much spoken. In proportion as the natives are becoming more enlightened by education, the Gaelic is decidedly losing ground." However, this proved to be wishful thinking of the local minister. The language was strong as ever even in 1881 when for the first time a census asked questions about language abilities in Scotland (see below).
In fig. 2 the temporal evolution of Gaidhlig-speaking intensity in these islands since 1881 shows the tendency prevailing until today.

Fig. 2: Gàidhlig-speakers (3 years and over) as percentage of total population between 1881 and 2011 census results for the islands of Ile (Islay), Diùra (Jura) and Colbhasa (Colonsay) ${ }^{4}$

### 2.1 From Victorian times until the Second World War (Census 1881-1931)

All islands of the Inner Hebrides were staunchly Gàidhlig-speaking in the late $19^{\text {th }}$ century. Generally, the general attitudes towards the language were no more favourable on Ile than in other parts of the country. This may be underlined by a citation from the introduction of Beachd Alasdair to the first volume of Carmina Gadelica: "Ignorant school-teaching and clerical narrowness have been painfully detrimental to the expressive language, wholesome literature, manly sports, and interesting amusements of the Highland people. Innumerable examples occur. A young lady said: "When we came to Islay, I was sent to the parish school to obtain a proper grounding in arithmetic. I was charmed with the schoolgirls and their Gaelic songs. But the schoolmaster - an alien like me - denounced Gaelic speech and Gaelic songs. On getting out of school one evening the girls resumed a song they had been singing the previous evening. I joined walingly, if timidly, my knowledge of Gaelic being small. The schoolmaster heard us, however, and called us back. He punished us till the blood trickled from our fingers, although we were big girls, with the dawn of womanhood upon us. The thought of that scene thrills me with indignation" (Alexander Carmicheal, 1899). As already mentioned in

[^2]
previous volumes of this series the official position of Gàidhlig in the educational system was really appalling at that time.

Table 1: Number of persons speaking Gàidhlig and all Gäidhlig-speakers as share of population in Diùra \& Colbhasa according to local census data from 1881 to 1911

Before addressing the official enumeration district figures for 1881-1911 in detail it is worthwhile to look more closely at the original 1891 census forms which provide interesting additional information. Generally, the census figures were still underestimating the real strength of the language because these statistics looked at the total population present at census night. The population figures included returns from occasional visitors and counted also children aged less than three years although their language preferences were not enumerated at all.

[^3]Therefore some "corrected" 1891 details about three communities in this very diverse archipelago are cited below ${ }^{10}$ (Duwe, 2006):

1. Colbhasa \& Orasa (Colonsay \& Oronsay): The most populous part of this island group was of course Colbhasa with its main settlements situated in the central part of the island. Besides a few farmers and shepherds and those serving at Kiloran House most people were occupied with crofting or fishing in those days. Apart from the two households at Baile na h-Ȧirde (Balnahard) on the northern tip of Colbhasa all settlements were overwhelmingly Gàidhlig speaking in 1891:"The locally born population spoke almost universally Gàidhlig. Among them was a significant minority which did not speak English. These monolingual speakers were almost exclusively confined to the young generation and the elderly. Residents with no speaking ability of Gàidhlig were in most cases born in the Lowlands or England." Contrary to the official census percentage of $88.7 \%$ the share of Gäidhlig speakers of the usually resident population was in fact 93.6 \%!
2. An Tairbeart \& An Lagg (Tarbert \& Lagg): The area covers the northern half of the mountainous and sparsely populated Hebridean island of Diùra (Jura). Besides a few crofter families all inhabitants in one way or another were dependent on work supplied by the landowners - employed as shepherds, gamekeepers or other servants in stately home or garden. All hamlets and dwellings in the northern part of Diùra (Jura) were predominantly Gàidhlig speaking communities: "The locally born population of this part of the island was almost exclusively Gàidhlig-speaking. Among the pre-school children and the elderly many residents did not speak English. In fact, the majority of the handful of "English only" returns came from the landowners' family at Ardlussa House and the lighthouse keepers at Sgèir Mhuile (Skervuile)." The official census percentage of $85.7 \%$ as share of Gäidhlig speakers was $8.6 \%$ less than the percentage found for the usually resident population (94.3 \%)!
3. Gruinneart (Gruinart): This area is situated on the shores of Loch Gruinneirt (Loch Gruinart) in the centre of the island of Ile (Islay). Main economic activity of the local population was farming and to some extent fishing. The majority of inhabitants were dependent fieldworkers on the local farms. "In principle Gäidhlig was the dominant tongue in every location in the area but especially so in Srath Ghruinneirt (Strath of Gruinart) with 100 \% of residents able to speak the traditional language of the island. The local population of this island district was almost exclusively Gàidhlig speaking. Among the very young and the older generation many inhabitants did not speak English in 1891. The handful of English only" speakers in the district were found in three farmer families and two schoolmaster households all with Lowland connections." In original census report terms the district had a population of 356 persons of all ages. 251 enumerated inhabitants spoke "Gaelic and English" and 83 were counted as monolingual Gàidhlig speakers. This led to an "official" share of Gàidhlig speakers of $93.8 \%$. This figure was an under-estimate of $3.6 \%$ compared with the more realistic figures taking into account only the usually resident population.

Generally, the population of all the islands was thoroughly Gàidhlig speaking. People "with no Gaelic" were in most cases either Lowland farmers, school teachers or (especially on Ile) specialist workers employed at the various distilleries. The underestimation by census reports concerning the strength of Gàidhlig speaking intensity has to be kept in mind when looking at census figures in more detail. However, the geographical variation between communities and the significance of "Gaelic only" returns can be deduced very accurately from the available census statistics.

[^4]Very detailed local information is available in census reports especially until 1901. The census reports and enumeration files provide a good impression of the geographical strength of the language in all parts of the area under scrutiny (see tables 1-5).

The islands of Colbhasa (Colonsay) and Diùra (Jura) were far less populated than neighbouring Ile at this period (table 1). Generally, all settlements and dwelling on these islands where overwhelmingly Gàidhlig speakers with very significant percentages of monolingual persons found on Colbhasa and parts of Diùra.

| Number of persons and percentage of Gàidhlig-speakers in selected districts of Cill Mheanaidh - 1881-1911 |  |  |  |  |  |  |  |

Table 2: Number of persons speaking Gäidhlig and all Gàidhlig-speakers as share of population in Cill Mheanaidh according to local census data from 1881 to 1901

The Ile district of Cill Mheanaidh (Kilmeny) in the north-east of the island (table 2) was equally very strongly Gàidhlig speaking. Of course, there was the odd hamlet like Caol Ila where English monoglot distillery workers (notably from Campbeltown) "diluted" the Gàidhlig language community in the period. Gàidhlig monolingual persons on the other hand became obviously a tiny minority as early as 1901 in this part of the island.

The Ile peninsula of Cill Chomain (Kilchoman) is commonly known as Na Ranna (Rhinns of Islay) and occupies the north-western wing of the island. Here the Gàidhlig language was especially strong between 1881 and 1911. Keeping aside census returns from farmers (often "imported" by the landowners

[^5]from Ayrshire) and several distillery staff the communities were almost exclusively Gàidhlig speaking. Very important in this context are the high proportions of monolingual Gàidhlig speakers (up to $40 \%$ ) reported for most parts of the districts within this period (table 3).

Table 3: Number of persons speaking Gàidhlig and all Gàidhlig-speakers as share of population in Cill Chomain or Na Ranna according to local census data from 1881 to 1911

The Ile district of Cill-à-Rubha (Killarow) constitutes practically the central part of the island with the village of Am Bogha Mòr (Bowmore) in its heart. The share of Gàidhlig speakers in some parts of this district (table 4) was slightly less than found for example in Na Ranna (Rhinns of Islay). In 1881 some $75 \%$ of all inhabitants were reported as "speaking habitually Gaelic". In 1891 it was perfectly clear that more persons in the district did speak Gäidhlig than anticipated in the census reports ten years before. Even around $10 \%$ of all Gàidhlig speakers still did not speak English in 1891. Even in the village of Am Bogha Mòr more than $80 \%$ of the total population spoke Gàidhlig in 1901!

Table 4: Number of persons speaking Gäidhlig and all Gäidhlig-speakers as share of population in Cill-àRubha according to local census data from 1881 to 1911

The civil parish of Cill Daltan (Kildalton) also includes the peninsula of An Obha (Oa) and extends over the southern part of the island of Ile. The Gàidhlig language was the dominant tongue among the local population (table 5) - even in the village of Port İlein (Port Ellen). Gàidhlig monolingual persons were most prominent in the more remote parts of the parish, especially on the peninsula of An Obha and the district around Aird Talla (Ardtalla) to the east.

From the statistics outlined above it can be clearly stated that the whole island group belonged to the heart of the Gaidhealtachd in the period before the First World War. This status should stay for decades to come.

Table 5: Number of persons speaking Gàidhlig and all Gàidhlig-speakers as share of population in Cill Dal$\tan \& A n O b h a$ according to local census data from 1881 to 1911

The share of the population reported as speaking Gàidhlig was very high in all censuses before the Second World War although a slight decrease was recorded from $93.5 \%$ speaking Gàidhlig "habitually" in 1881 and 79.4 \% speaking Gàidhlig in 1931 (table 6). In 1891 the "Gàidhlig monoglots" were still more numerous than those inhabitants who spoke only English (fig. 3). But with the influence of compulsory education "Gaelic only" was soon confined to pre-school and old age generations (table 20).

Table 6: Number of Gàidhlig-speakers in Ile, Diùra \& Colbhasa (Islay, Jura \& Colonsay) and percentage of total population speaking Gäidhlig during 1881-1931

The anglicisation pressures in the Argyll-shire islands were much stronger than in island communities further north. Whereas the percentage of "Gaelic only" speakers in the 3-4 age-group remained almost the same in the islands of Ross \& Cromarty and Inverness-shire until 1931, this share was almost halved

[^8]in the Argyll-shire islands from 56.7 \% in 1891 to $30.5 \%$ in 1931. Although there is no information available on individual islands it is fair to assume that this trend was more or less universal on all easily accessible islands of the county like Ile (Islay) and Muile (Mull).

Fig. 3: Share of population speaking Gäidhlig and/or English in the study area according to census results in 1891, 1911 and 1931

Nevertheless, all islands around Ile remained overwhelmingly Gàidhlig-speaking until the 1940s with the highest intensities on the island of Colbhasa (Colonsay) and in the western division of Ile called Na Ranna or Rhinns of Islay. Here on his study visit dedicated to Argyllshire Gaelic Nils M. Holmer stayed in 1935 around Port Sgioba (Port Charlotte). At that time, he still could report "... had the good fortune to live with a family who spoke most idiomatic Gaelic" (Holmer, 1938). The islands were part of the Gaidhealtachd as any in the Hebrides in those days.

### 2.2 More Recent Developments (Census 1951-2011)

Between 1931 and 1951 the population of the islands dropped by around $15 \%$ because of the economic and social disruptions experienced during and after the war. The share of Gàidhlig-speakers fell also from $79.4 \%$ to $68.9 \%$ (table 7) with the strongest decrease reported for the civil parish of Cill Daltan (Kildalton) around Port Ilein (Port Ellen). The number of people speaking "Gaelic only" had become almost negligible with 11 persons recorded in 1951 compared with 92 back in 1931 (table 18). The older "monoglots" had passed away and only a few young Gaels were immersed in a "Gaelic only" family.

Information for the 1957/58 school year sheds some light on the situation then. The report on Gaidhligspeaking schoolchildren in Highland schools (Scottish Council for Research in Education, 1961) reported in the Islay school district (including Colonsay and Jura) still 81 of 472 primary school children as first or preferred language speakers ( $17.2 \%$ ). 17 of 66 secondary school children (first year) had Gàidhlig as first language ( $25.8 \%$ ). Additionally, 33 secondary pupils spoke Gàidhlig as a second language leaving only a minority of their peers as English-only speakers. In the nursery stages of P1 and P2 there were 20 first language speakers of Gàidhlig, a further 17 children spoke Gàidhlig as second language. In total 57 out of 120 understood some Gàidhlig ( $47.5 \%$ )! Gàidhlig was the language of home for all first language speakers. The status of the language in those days was very low in ordinary school life. Although the nursery schoolteachers were themselves Gàidhlig-speaking in most of the schools the main medium of instruction was always English. Only in two schools was time set aside for teaching Gäidhlig (as a second language) and only there the language was used in some oral work. It is highly probable that these two primary schools were situated at Port na h-Aibhne (Portnahaven) on the westernmost tip of Ile and/or on the island of Colbhasa (Colonsay).

Table 7: Number of Gàidhlig-speakers in Ile, Diùra \& Colbhasa (Islay, Jura \& Colonsay) and percentage of total population speaking Gàidhlig during 1951-2011

In the 1961 census all CCEDs (County Council Electoral Divisions) still had a majority of Gàidhligspeakers. But no "Gaelic only" returns were recorded. The civil parishes of Cill Chomain (64.8 \%) and Colbhasa \& Orasa ( 72.9 \%) were the strongest language communities in the island group. The general trend, however, remained unabated and pointed downwards.

In 1971 Cill Chomain and Colbhasa only stayed above the $50 \%$ mark (table 14). Nonetheless there were still some younger people able to speak Gàidhlig (in contrast for example to the contemporary situation on Muile (Mull) where essentially almost no children were Gadidhlig-speaking at that time). In the age-group between 3 and 24 the respective percentages were $20.5 \%$ in Cill Chomain, $22.5 \%$ in Cill-àRubha, 16.7 \% in Cill Daltan and 16.7 \% in Diùra \& Colbhasa. The latter figure might disguise a more favourable situation on Colbhasa as was mentioned by John Mercer (1974): "In fact, on Colonsay in 1972 it was said that Gaelic is understood by even the youngest children and that it is the normal tongue of adults, though it can only be written by those who have learned it at school; from 1973 it has been made compulsory, during the first year (of secondary education, the author), by Oban High School." Matters were to deteriorate further, however, in the coming years and with the exception of some secondary school teaching Gàidhlig stayed outside the classrooms of island schools.

The language lost ground swiftly with Cill Chomain only just managing to keep a Gàidhlig-speaking majority in 1981. The townships on Na Ranna (Rhinns of Islay) remained the last communities with respectable percentages: 1981 figures for census output areas reveal considerable population shares here with 86.7 \% for Losaid (Lossit), 65.6 \% for Port na h-Aibhne (Portnahaven), 56.9 \% for Port Sgioba (Port Charlotte) and $51.1 \%$ for Bruthaich a'Chladaich (Bruichladdich). The islands of Colbhasa and Diùra experienced stronger emigration and immigration than Ile and both reported decreases in the number of speakers by roughly a third (table 13). Figure 4 illustrates the ability of speaking, reading or writing Gäidhlig in the individual ages between 3 and 15 for the area in 1981. It is obvious that practically no mother tongue speakers were left, and that language tuition started only at secondary school age. The latter had been intensified after Strathclyde Region had superseded Argyll County Council as educational authority for the islands.

In the 1980s parents in many parts of Scotland became very much concerned with the future of the language and wanted to ensure that their children could speak the local language, too. These initiatives reached also Ile with the establishment of a cròileagan (Gàidhlig-medium playgroup) around 1986. Subsequently Gàidhlig-medium education was introduced in the primary school of Bogha Mòr (Bowmore) in 1987. This unit, however, was almost constantly under threat of closure because of the dramatic teacher shortage for suitable primary teachers. Due to this prevailing uncertainty pupil numbers remained comparatively low until the beginning of the $21^{\text {st }}$ century.

Fig. 4: Percentage of children able to speak, read or write Gàidhlig in different age groups in 1981 Ile, Diùra \& Colbhasa (Islay, Jura \& Colonsay)

The census of 1991 provided no surprises for the island group - the number of speakers still decreased significantly from 1,642 in 1981 to 1,265 ( $33.9 \%$ ). Only two census output areas (table 22) had majorities of Gàidhlig-speakers, and both were situated in the district of An Ranna (Rhinns of Islay): Bruthaich a'Chladaich (52.6 \%) and Port na h-Aibhne (53.3 \%). Especially language teaching at secondary school level succeeded to keep the percentages in the 5-24 age-group between 1981 and 2001 at the same level of around $20 \%$ (see fig. 5). In all other age groups, the language lost ground very fast in this period with only $10.9 \%$ of those aged between 25 and 44 able to speak Gaidhlig in 2001! Also, at pre-school age the number of Gàidhlig-speaking children remained very low indeed (table 21). Detailed analysis of the 2001 census is provided in chapter 3 of this report.

Fig. 5: Percentage of Gàidhlig-speakers in different age groups between 1971 and 2001 - Area of Ile, Diùra \& Colbhasa (Islay, Jura \& Colonsay) ${ }^{23}$

[^9]An important positive development for $I l e$ was first mooted in 1998 with plans to establish a Gàidhlig further education centre at Bogha Mòr on the lines of the very successful Sabhal Mòr Ostaig on An tEilean Sgitheanach (Isle of Skye). However, this came to fruition with the establishment of Ionad Chaluim Chille (St. Columba Centre) only after 2001.

Gàidhlig in these islands remained still a minority issue in the forthcoming decade. However, progress was visible but slow and growth remained gradual. The most important new development had been the opening of Ionad Chaluim Chille (St. Columba Centre) at Bogha Mòr. This further education establishment was hoped to act as a catalyst for a re-invigoration of the language on Ile. In the meantime, the Gàidhlig-medium unit at the local primary school reported almost the same pupil numbers as teachers were very difficult to recruit. The presence of the language among pre-school children for example in 2003/2004 was still very rare with just two pupils being enrolled at the age of 3 or 4 at the nursery unit in Bogha Mòr. But here progress can be reported. In 2006 a Gàidhlig nursery was being attached to Ionad Chaluim Chille. A further encouraging fact was that the GLPS programme (Gaelic Language for Primary School) did arrive at last on Ile. Therefore, all primary school children should have received at least some smattering of the language. This was, however, not apparent in the 2011 census results!!!

| Census Data Zones | Ile, Diùra \& Colbhasa - Census 2011 |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Knowledge of Gàidhlig |  |  |  |  | Gàidhlig as home language (\% of speakers) |
|  | Young age(3-15) |  | All ages |  | Difference (Language viability indicator) |  |
| Port Eilein \& Bogha Mòr (Port Ellen \& Bowmore) | 15 | 15.6\% | 213 | 28.2\% | -12.6 \% | 46.3 \% |
| Cill Chomain \& Baile a'Ghràna (Kilchoman \& Ballygrant) | 26 | 20.0\% | 216 | 26.5\% | -6.5 \% | 59.6 \% |
| Diùra \& Colbhasa (Jura \& Colonsay) | 1 | 3.6\% | 51 | 16.0\% | - 12.5 \% | 46.3 \% |
| In comparison: <br> Earra-Ghàidheal \& Bòd (Argyll \& Bute) |  | 6.7 \% |  | 5.9 \% | + 0.8 \% | 36.9 \% |

Table 8: Intergenerational viability and Gäidhlig as home language in selected census data zones in comparison with the whole Earra-Ghaidheil \& Bòd (Argyll \& Bute) local authority according to census data of 2011

2011 saw the population on the island of Ile falling slightly from 3.457 in 2001 to 3.228 inhabitants. 2.678 of these were born in Scotland ( $83.0 \%$ ) compared with $86.2 \%$ ten years before. There was generally a further decrease of Gàidhlig speaking in the area. This was mainly due to less satisfactory education on young age level (table 8). In tables 14 and 15 the most recent figures on civil parish level are given. A similar pattern was observed on Diùra and Colbhasa where virtually all speakers were recorded among older people. Keeping in mind that in the school year 2010-11 just 14 pupils attend the GMU in Bogha Mòr (Bowmore) and all secondary pupils had Gàidhlig second language teaching, 41 children
in the 3 to 15 age group in 2011 were a realistic figure. Therefore, any second language teaching in primary school must have had negligible effects.

Unfortunately, the local data about the age structure of the language community were not as detailed in 2011 as in previous censuses. In contrast to the previously used small output areas, in 2011 the somewhat larger data zones were used as smallest geographical area for age distribution analysis. Accordingly, a direct comparison with 2001 data is not always possible. However, the figures of Gaidhlig knowledge for the 3-15 age group and the total population are provided in table 8 above for selected local data zones. The intergenerational viability of these selected census data zones showed markedly negative tendencies.

A new feature in the 2011 census was a question about the language (other than English) used at home. This saw in this area around $50 \%$ of Gäidhlig speakers did live in households where the language was used. This information is also provided in table 8.

Bilingual road signs are nowadays a common sight on Ile (Duwe, 2016)

### 2.3 Development of literacy in Gàidhlig between 1971 and 2011

The fact that Gàidhlig had been neglected educationally on Ile and its neighbouring islands became obvious with literacy information in 1971. Details on this aspect of language use became available then for the first time: Census questions were introduced on the ability to read or write Gäidhlig (see tables 9 and 10 below). Even for Argyll-shire standards figures were very low with only $29.1 \%$ of speakers able to read and 16.9 \% able to write Gàidhlig. Only the Diùra \& Colbhasa CCED (County Council Electoral Division) reported a somewhat better share of Gàidhlig readers with a value of $43.3 \%$.

|  | Number of Gàidhlig-speakers <br> with ability to read Gàidhlig |  |  |  | Percentage of Gàidhlig-speakers with abil- <br> ity to read Gàidhlig |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1971 | 1981 | 1991 | 2001 | 2011 | 1971 | 1981 | 1991 | 2001 | 2011 |
| IIe, Diùra \& Colbhasa <br> (Islay, Jura \& Colonsay) | 585 | 659 | 548 | 427 | 330 | $29.1 \%$ | $40.2 \%$ | $43.6 \%$ | $49.2 \%$ | $51.7 \%$ |

Table 9: People able to read Gàidhlig and Gàidhlig readers as percentage of Gàidhlig-speakers (1971-2011)

|  | Number of Gàidhlig-speakers <br> with ability to write Gàidhlig |  |  |  | Percentage of Gàidhlig-speakers with abil- <br> ity to write Gàidhlig |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1971 | 1981 | 1991 | 2001 | 2011 | 1971 | 1981 | 1991 | $\mathbf{2 0 0 1}$ | 2011 |
| Ile, Diùra \& Colbhasa <br> (Islay, Jura \& Colonsay) | 340 | 466 | 435 | 335 | 265 | $16.9 \%$ | $28.4 \%$ | $34.6 \%$ | $38.6 \%$ | $41.5 \%$ |

Table 10: People able to write Gàidhlig and Gàidhlig writers as percentage of Gàidhlig-speakers (1971-2011)

Since 1971 every census reported improved literacy levels (fig. 6) but the situation leaves still much room for improvement. Literacy on Ile is for example still $15 \%$ less than on Muile where conditions can be considered as comparable. In 2001 a value of less than $50 \%$ of reading ability among Gàidhligspeaking primary school children is not satisfactory at all. The 2011 census percentages in literacy did show a slight improvement but stayed on a comparatively low level.

Fig. 6: Persons able to read Gàidhlig as a percentage of Gàidhlig-speakers for both areas in different age groups (1971-2001)

## 3 Digression: The Situation of 2001 in Focus

Census results for 2001 were the most comprehensive and detailed information base ever provided for Scotland. This was also true for the inclusion of questions on Gàidhlig language knowledge. Two new aspects were introduced:

1. Persons were asked whether they were "able to understand spoken Gaelic".
2. Children under the age of 3 were enumerated regarding their language abilities.

IMPORTANT NOTICE: The more recent census data of 2011 were not as detailed as 2001 regarding generational differences in language use. Therefore 2001 is used here as baseline for research purposes. The following sections will describe generally the distribution of language abilities (inter-generational and community by community) and the specific conditions of the younger age groups in local primary school catchments.

### 3.1 General overview: Gàidhlig language capabilities in 2001

As mentioned above special consideration will be given to educational aspects in section 3.2 dealing with the young generation in school catchments. In general, the following conclusions may be drawn from the 2001 census information for the island group:

- Except the age group at secondary school level there was a constant decrease in Gàidhlig language abilities (fig. 7) from older to younger generations. Only $2 \%$ of pre-school children knew the language. Intergenerational language difference (table 10) was very negative although slightly better than around 1991.
- A considerable decrease in Gàidhlig-speaking had occurred since 1991 (table 10) especially in older age groups. In the age cohort of 3-24 the percentage of Gàidhlig-speakers stayed almost the same on a comparatively low level of around $17 \%$.
- The local details of census output areas showed marked differences. The category of speaking the language ranged from a share of roughly $42 \%$ in Port na h-Aibhne (Portnahaven) to some $8 \%$ in parts of Diùra. The corresponding figures for the „understands spoken Gaelic" category varied between around $49 \%$ and $12 \%$ respectively in the same locations.
- Almost the whole population lived in neighbourhoods where over $20 \%$ of the people knew at least some Gaidhlig.
- Literacy in the language was still improving with $49.2 \%$ of speakers being able to read and $38.6 \%$ of speakers able to write the language. The general level remained still at a low level compared with other language communities in the Hebrides.
- In the new category of children aged less than 3 years just two were able to speak Gàidhlig and three children understood spoken Gàidhlig.
- In addition to those able to speak Gàidhlig ( 23.1 \% of the population) another 375 inhabitants ( $10.0 \%$ ) were at least able to understand, read or write the language.

Fig. 7: Percentage of population able to understand or speak Gäidhlig and year of birth - area of Ile, Diùra \& Colbhasa (Islay, Jura \& Colonsay) according to Census 2001

| Age group | 2001 |  |  |  |  |  | $\begin{gathered} \hline 1991 \\ \hline \text { Able to speak } \\ \text { Gàidhlig } \end{gathered}$ |  | $\begin{gathered} \hline \text { Diff. } \\ 2001 \text { - } \\ 1991 \\ \hline \text { n/a } \end{gathered}$ |

### 3.2 Children with knowledge of Gàidhlig in primary school catchments

The small area statistics can be generalised for individual school catchments to calculate numbers and percentages for different age groups (table 11). For the purpose of this investigation, they have been attributed to pre-school age (0-4), primary school age (5-11), secondary school age (12-15) and main parental generation (24-35).

At first glance it is obvious that the educational provision was far from satisfactory:

- Pre-school children: The number of just 5 children being able to understand spoken Gàidhlig was highly unsatisfactory for a district with such a strong tradition. At the time of the census only one cròileagan existed in Bogha Mór with an obviously very small roll.
- Primary school children: A Gàidhlig-medium unit existed in Bogha Mòr primary school with 17 pupils in the 2000/2001 school year (see also fig. 9). This constituted $5.5 \%$ of all 308 primary school children in the island group. Looking at the overall figures there was certainly some second language teaching in other primary schools with limited but visible impact.
- Secondary school children: In secondary stages S1 and S2 all pupils from Ile and Diùra in Bowmore High School were learning Gàidhlig as a second language except for a handful of fluent speakers who had gone through GME in primary schools before entering secondary education. The returns were accordingly higher than for the primary sector. Secondary schooling for Colbhasa children took place in Oban High School and there Gàidhlig was obviously not high on the agenda.
- Parents: There was a certain language background in the "parental generation" within the language community. The comparison with the number of pre-school children highlighted a very weak language transmission in the island group.

| Knowledge of Gàidhlig (Census 2001) in Selected Primary School Catchment Areas ${ }^{25}$ |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Primary School(s) | $\begin{gathered} \text { 'Pre-School'" } \\ \text { Age 0-4 } \\ \hline \end{gathered}$ |  | $\begin{gathered} \text { 'Primary'" } \\ \text { Age 5-11 } \\ \hline \end{gathered}$ |  | $\begin{aligned} & \text { 'Secondary' } \\ & \text { Age 12-15 } \\ & \hline \end{aligned}$ |  | "Parents'" <br> Age 25-34 |  |
| Cill Chatain (Colbhasa) (Kilchattan) | - | - | - | - | - | - | 2 | 22.2 \% |
| Na h-Eileanan Beaga (Diùra) (Small Isles - Jura) | - | - | - | - | 5 | 62.5 \% | - | - |
| Na Cilltean (Keills) | - | - | 8 | 16.7 \% | 9 | 27.3 \% | 17 | 37.8 \% |
| Beul an Atha (Bridgend) | - | - | 3 | 13.0 \% | 7 | 58.3 \% | 10 | 27.8 \% |
| Port Sgioba (Port Charlotte) | 1 | 4.6 \% | 8 | 21.1 \% | 13 | 54.2 \% | 12 | 26.1 \% |
| Port na h-Aibhne (Portnahaven) | 1 | 100 \% | 3 | 50.0 \% | 3 | 75.0 \% | 3 | 50.0 \% |
| Am Bogha Mòr (Bowmore) | 1 | 2.1 \% | 16 | 19.8 \% | 20 | 36.4 \% | 34 | 22.8 \% |
| Port Ilein (Port Ellen) | 2 | 2.9 \% | 16 | 16.8 \% | 22 | 26.5 \% | 24 | 20.0 \% |

Table 12: Number and percentage of persons with knowledge of Gàidhlig in selected age groups for primary school catchment areas according to the census 2001

Looking at the wider picture the educational efforts and associated census results on all three islands were disturbingly low - apart from the secondary sector. The use of the language in the younger generation was not at all common - perhaps with the notable exception of the township of Port na h-Aibhne (Portnahaven) on the westernmost tip of Ile.

[^11]
## 4 Future Perspectives - 2011 and beyond

Looking in detail on the 2011 census results it must be conceded that all islands still showed a limited language maintenance potential. The decidedly negative language viability indicator ( $\mathrm{LVI}^{26}$ ) underlines a poor intergenerational language-maintenance, which is shown below in table 13.

| Area | Ile, Diùra \& Colbhasa - Census 2011 |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Knowledge of Gàidhlig |  |  |  |  | Gàidhlig as home language (\% of speakers) |
|  | Young age (3-15) |  | All ages |  | Difference (Language viability indicator) |  |
| Ile, Diùra \& Colbhasa (Islay, Jura \& Colonsay) | 42 | 16.5\% | 480 | 25.4\% | - 8.9 \% | 52.4 \% |
| In comparison: <br> Earra-Ghàidheal \& Bòd (Argyll \& Bute) |  | 6.7 \% |  | 5.9 \% | + 0.8 \% | 36.9 \% |

Table 13: Intergenerational viability and Gàidhlig as home language in Ile, Diùra \& Colbhasa (Islay, Jura \& Colonsay) in comparison with the whole Earra-Ghaidheil \& Bòd (Argyll \& Bute) local authority according to census data of 2011

Future educational progress: The overall temporal evolution of Gàidhlig-medium primary education is depicted in fig. 9 for the period 1992-2023. For example, in the 2023-24 session 22 pupils ( $10.3 \%$ of all Ile primary pupils) attended the GMU in Bogha Mòr (Bowmore). Moreover, all remaining primary school pupils now (2024) receive Gàidhlig lessons as "Language 2" (L2) in all stages from P1 to P7. This is also true for the primary schools on Diùra and Colbhasa. A positive development indeed!

In conclusion: Gàidhlig in the southernmost Hebrides still suffers from decades of neglect and ignorance. The basis for a possible consolidation of language use is still rather limited and the language community has a strong bias towards the older generation. Educational provision is just improving to reach a comparable level with other islands in the Inner Hebrides. This provides the main potential for future growth. Future positive impacts can be expected by the extension of activities around Ionad Chaluim Chille.

## III. Some Valuable Comments about Census Information

The interpretation of census figures (derived statistics in particular) is not as straightforward as the pure numbers might suggest. The author has taken great pains to compare like with like and the calculated tables with greatest geographical detail and age group information as possible. But the differences of census questions, enumeration districts and information details between years are quite substantial. It is therefore very important to notice the following facts:

1. Questions on Gàidhlig have been raised in census enumerations in Scotland since 1881. In this first instance, however, it was asked whether the person 'speaks Gaelic habitually' and the information was provided by the enumerator. From 1891 onwards this wording was changed into "speaks Gaelic" and the information was given by the head of the household. Accordingly direct comparison of the results of 1881 and later years is not possible.
2. Until 1971 it was asked whether the person "speaks Gaelic and English" or "speaks Gaelic but not English' (Gaelic only). Due to the simple necessity to survive in an English dominated society and the considerable impact of the school system in fact all Gàidhlig-speaking people were forced to become bilingual - with the notable exceptions of pre-school children and very old people. These "Gaelic only" persons did not, however, present those who had Gäidhlig as their natural and preferred language nor were they the only mother tongue speakers. This was already highlighted after the census 1911 by comments given by the then registrar general and the superintendent of statistics in the county report on Inverness (Census Office, Scotland, 1912): "When discussing the statistics of the Gaelic-speakers of Argyll we expressed an opinion that the reduction in the number of persons speaking Gaelic but unable to speak English should not be taken as a proof that the use of the language was being discontinued, and after making a similar study of statistics of the Gaelicspeakers of the islands of Inverness, we are in a position to repeat that opinion. One fact alone seems to justify such an expression, and that is that fully three-fourths of the children of less than school age, more than three but less than five, speak Gaelic exclusively. Such a condition seems possible only when Gaelic is the language habitually spoken in the homes, and this seems conclusive evidence of its wide and habitual use." Due to the ever-increasing presence of English in the Gàidhlig community (mixed language marriages, in-migration of English only speakers, radio and television) more and more children under the age of 5 became bilingual and the census question proved to be irrelevant after the $2^{\text {nd }}$ World War. Because of the very small numbers involved and the ambiguety of the question no census enumeration took place after 1971 on persons who spoke Gàidhlig but no English.
3. No data are available on persons speaking Gàidhlig outside Scotland in the rest of the United Kingdom. Census returns are, however, recorded in Canada where the Gäidhlig language survived as a community language in a few locations of the province of Alba Nuadh (Nova Scotia) well into the 1940s.
4. During Word War II no census was taken. Therefore, no figures are available for 1941.
5. In 1971 the wording was changed from "speaks Gaelic" into "is able to speak Gaelic". This resulted in areas with low density of speakers in a substantial increase of Gàidhlig-speakers counted compared with 1961. These were essentially those who could speak Gàidhlig but did not have the opportunity to use it. In strongly Gàidhlig-speaking areas those who were able to speak Gàidhlig were also using the language. So in the islands and on the western seabord the figures should have remained comparable with previous censuses.
6. In 1981 the population basis was changed from persons present on census night to usually resident persons. In the light of increased mobility of the population this change was inevitable.
7. From 1971 onwards additional questions were asked on the ability of people to read Gàidhlig or to write Gàidhlig.
8. In 2001 another question was introduced on the ability of a person to understand spoken Gàidhlig. This may have had an influence on some people with only a small command of the language to record themselves as being able to understand rather than able to speak the language. Without this choice some of them might have enlisted themselves or their children as Gàidhlig-speaking in order to be counted at all. This may explain the small decrease of speakers in the age group of 3 to 4 despite the strong efforts by the croileagan movement in the preceding decade.
9. Additionally in 2001 for the first time all children under the age of 3 were recorded with their knowledge of Gàidhlig. In previous enumerations these children were not counted or (in 1891 and 1901) only a few children were enumerated in this age group. In many census publications percentages were calculated by using the enumerated Gàidhlig-speaking population (aged 3 years and over) on the basis of the total population. This led to slightly lower percentages than actually existed.
10. Census counts are not strictly exact. Apart from inevitable small enumeration errors the census authorities have introduced measures to keep returns anonymous. For example in 1971 figures in tables were rounded to the nearest 0 or 5 . This fact represented a major obstacle in using small area statistics for further evaluation because of the small numbers involved. Comparable measures were taken in later censuses but with smaller overall 'uncertainties' of $+/-1$ in general.

## V. List of Tables

## REPORT

1 Number of persons speaking Gàidhlig and all Gàidhlig-speakers as share of population in
8

3 Number of persons speaking Gàidhlig and all Gàidhlig-speakers as share of population in Cill Chomain or Na Ranna according to local census data from 1881 to 1911
4 Number of persons speaking Gàidhlig and all Gàidhlig-speakers as share of population in Cill-12 $\grave{a}$-Rubha according to local census data from 1881 to 1911
5 Number of persons speaking Gàidhlig and all Gàidhlig-speakers as share of population in Cill 13 Daltain \& An Obha according to local census data from 1881 to 1911
6 Number of Gàidhlig-speakers in Ile, Diùra \& Colbhasa (Islay, Jura \& Colonsay) and percent13 age of total population speaking Gàidhlig during 1881-1931
7 Number of Gàidhlig-speakers in Ile, Diùra \& Colbhasa (Islay, Jura \& Colonsay) and percent15 age of total population speaking Gàidhlig during 1951-2011
8 Intergenerational viability and Gàidhlig as home language in selected census data zones in comparison with the whole Earra-Ghaidheil \& Bòd (Argyll \& Bute) local authority according to census data of 2011
9 People able to read Gàidhlig and Gàidhlig readers as percentage of Gàidhlig-speakers (197119 2011)

10 People able to write Gàidhlig and Gàidhlig writers as percentage of Gàidhlig-speakers (197119 2011)

11 Knowledge of Gàidhlig in younger age groups in Ile, Diùra \& Colbhasa (Islay, Jura \& Colon-21 say) in 2001 and 1991
12 Number and percentage of persons with knowledge of Gàidhlig in selected age groups for 23 primary school catchment areas according to the census 2001
13 Intergenerational viability and Gàidhlig as home language in Ile, Diùra \& Colbhasa (Islay, Ju24 ra \& Colonsay) in comparison with the whole Earra-Ghaidheil \& Bòd (Argyll \& Bute) local authority according to census data of 2011
14 Number of Gàidhlig-speakers (aged 3 years and over) for the five civil parishes in the area ac-26 cording to census data from 1881 to 2001
15 Gàidhlig-speakers (aged 3 years and over) as percentage of total population for the five civil 26 parishes in the area according to census data from 1881 to 2001
16 Number of persons speaking Gàidhlig in 1881 - selected areas (civil parishes, ecclesiastic parishes, census registration districts, villages or inhabited islands) in Ile, Diùra \& Colbhasa
17 Number of persons speaking Gàidhlig in 1891 - selected areas (civil parishes, ecclesiastic parishes, census registration districts, villages or inhabited islands) in Ile, Diùra \& Colbhasa
18 Number of persons speaking Gàidhlig in 1901 - selected areas (civil parishes, ecclesiastic par29 ishes, census registration districts, electoral areas, villages or inhabited islands) in Ile, Diùra \& Colbhasa
19 Number of persons speaking Gàidhlig between 1911 and 1971 - civil parishes in Ile, Diùra \& Colbhasa
20 Number of persons speaking Gàidhlig and all Gàidhlig-speakers as a percentage of the popu31 lation (aged three years and over) for pre-1975 county council electoral divisions (CCED) according to census data from 1961 to 2001
21 Percentage of persons speaking Gàidhlig but no English (aged three years and over) for different age groups in island parishes of former Argyll according to census data from 1891 to 1931
22 Population with Gàidhlig knowledge in output areas of Ile (Islay) according to age group and ..... 32birthplace in 198123 Population with Gàidhlig knowledge in output areas of Diùra \& Colbhasa (Jura \& Colonsay)33according to age group and birthplace in 1981
24 Number and percentage of Gàidhlig-speakers in different age groups in Ile, Diùra \& Colbhasa ..... 33(Islay, Jura \& Colonsay) according to data from 1971 to 2001
25 Number and percentage of Gàidhlig-speakers for the census output areas in Ile, Diùra \& ..... 34Colbhasa (Islay, Jura \& Colonsay) according to data from 1981 to 2001
26 Intergenerational viability and Gàidhlig-speakers born in Scotland in Ile, Diùra \& Colbhasa ..... 35(Islay, Jura \& Colonsay) according to census data of 2001 - Part A
27 Intergenerational viability and Gàidhlig-speakers born in Scotland in Ile, Diùra \& Colbhasa ..... 36(Islay, Jura \& Colonsay) according to census data of 2001 - Part B

sus dates for Ile, Diùra \& Colbhasa (Islay, Jura \& Colonsay) - 1961-2001 - Part B

## VI. List of Figures

## REPORT

1 Overview map of area under investigation 6
2 Gàidhlig-speakers (3 years and over) as percentage of total population between 1881 and 20117 - islands of Ile (Islay), Diùra (Jura) and Colbhasa (Colonsay)

3 Share of population speaking Gàidhlig and/or English in the study area according to census 14 results in 1891, 1911 and 1931
4 Percentage of children able to speak, read or write Gàidhlig in different age groups in 1981 - 16 Ile, Diùra \& Colbhasa (Islay, Jura \& Colonsay)
$5 \quad$ Percentage of Gàidhlig-speakers in different age groups between 1971 and 2001 - Area of Ile, 16 Diùra \& Colbhasa (Islay, Jura \& Colonsay)
6 Persons able to read Gàidhlig as a percentage of Gàidhlig-speakers for both areas in different 19 age groups (1971-2001)
7 Percentage of population able to understand or speak Gàidhlig and year of birth - area of Ile, 21 Diùra \& Colbhasa (Islay, Jura \& Colonsay) according to Census 2001
8 Share of population living in neighbourhoods (census output areas) with different intensity of 22 language knowledge in Ile, Diùra \& Colbhasa (Islay, Jura \& Colonsay) according to Census 2001
9 Share of primary school children attending Gàidhlig-medium classes on Ile in comparison 25 with neighbouring Muile (September 1992 - September 2023)
10 Overview map of census output areas for Ile, Diùra \& Colbhasa (Islay, Jura \& Colonsay) 52

## VII. List of Abbreviations

There are a number of abbreviations used in the text which might not be known by every reader. Therefore, this short list intends to facilitate better understanding:

| CCED | County council electoral division <br> CP |
| :--- | :--- |
| Civil parish |  |

[^0]:    ${ }^{1}$ Original census data shown or used were supplied and/or published by the General Register Office for Scotland. The use of this material in this study is permitted under Licence No. C02W0003665. Crown Copyright of census data is acknowledged.
    ${ }^{2}$ Tables were extended with more census results of enumeration districts provided for 1881, 1891, 1901, 1911 and 1981.

[^1]:    ${ }^{3}$ Digital boundaries courtesy of Ordnance Survey as part of Geography Products provided by GROS for the 2001 census.

[^2]:    ${ }^{4}$ There was no census taken in 1941 because of World War II - values are therefore interpolated between 1931 and 1951.

[^3]:    ${ }^{5}$ Enumeration division or islands.
    ${ }^{6}$ Percentages of Gàidhlig-speakers above $50 \%$ are marked by bold figures.
    ${ }^{7}$ Percentages of monolingual Gàidhlig-speakers above $10 \%$ are marked by bold figures.
    ${ }^{8}$ Figures include the islands of Lungaigh (Lunga), Na Garbh Eileacha (Garvellochs) and Plada (Pladda Lighthouse).
    ${ }^{9}$ Figures include the rock of Sgeir Mhuile (Skervuile Lighthouse).

[^4]:    ${ }^{10}$ After a period of 100 years information provided on the original census forms is publicly available. At the time of writing this is already the case for census returns of $1881,1891,1901$ and 1911.

[^5]:    ${ }^{11}$ Enumeration division.
    ${ }^{12}$ Percentages of Gàidhlig-speakers above $50 \%$ are marked by bold figures.
    ${ }^{13}$ Percentages of monolingual Gàidhlig-speakers above $10 \%$ are marked by bold figures.

[^6]:    ${ }^{14}$ Enumeration division or village.
    ${ }^{15}$ Percentages of Gàidhlig-speakers above $50 \%$ are marked by bold figures.
    ${ }^{16}$ Percentages of monolingual Gàidhlig-speakers above $10 \%$ are marked by bold figures.

[^7]:    ${ }^{17}$ Enumeration division or village.
    ${ }^{18}$ Percentages of Gàidhlig-speakers above $50 \%$ are marked by bold figures.
    ${ }^{19}$ Percentages of monolingual Gàidhlig-speakers above $10 \%$ are marked by bold figures.

[^8]:    ${ }^{20}$ Enumeration division or village.
    ${ }^{21}$ Percentages of Gàidhlig-speakers above $50 \%$ are marked by bold figures.
    ${ }^{22}$ Percentages of monolingual Gàidhlig-speakers above $10 \%$ are marked by bold figures.

[^9]:    ${ }^{23}$ Under 5: Gàidhlig abilities in the age group 3-4 until 1991, in 2001 in all age groups 0-4.

[^10]:    ${ }^{24}$ Persons able to understand spoken Gàidhlig and/or able to speak, read or write Gàidhlig.

[^11]:    ${ }^{25}$ Percentages of $50 \%$ or more are denoted by bold letters.

[^12]:    ${ }^{26}$ LVI: The "Language Viability Indicator" is a measure of the prospective reproductivity of language speakers in a community. It is here defined on the basis of knowledge of Gàidhlig in the census and is calculated by the difference of percentages between the age group below 16 years of age and the total population.

[^13]:    ${ }^{27}$ Due to rounding of figures to the nearest 0 and 5 it is impossible to provide exact "Gaelic only" numbers in 1971 .

[^14]:    ${ }^{28}$ Civil parishes on islands of Ile (Islay), Muile (Mull), Tir Iodh (Tiree), Colla (Coll), Colbhasa (Colonsay), Diùra (Jura) and Giogha (Gigha) (Scotland Census Office, 1932).

[^15]:    ${ }^{29}$ Figures may not add up exactly because of measures to keep returns anonymous.
    ${ }^{30}$ A more detailed list of all locations in each output area is to be found in section IV.
    ${ }^{31}$ Scottish born population aged 3 years and over.

[^16]:    ${ }^{32}$ Figures may not add up exactly because of measures to keep returns anonymous.
    ${ }^{33}$ A more detailed list of all locations in each output area is to be found in section IV.
    ${ }^{34}$ Scottish born population aged 3 years and over.
    ${ }^{35}$ Information only available since 2001.

[^17]:    ${ }^{36}$ Statistical base is the population aged 3 years and over for 1981 and 1991 and the total population in 2001.

[^18]:    ${ }^{37}$ Digital boundaries courtesy of Ordnance Survey as part of the Geography Products provided by GROS for the 2001 census
